

LOW VOLTAGE SWITCHING DEVICE

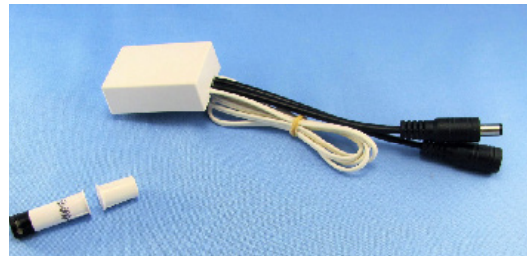

LVSD and LEDSD

- ◆ 2 Amps Switching
- ◆ Light Gauge Wire Uses
- ◆ 12 or 24 Volt DC Switching
- ◆ Water Resistant
- ◆ Programming Options Available

LVSD

LEDSD

The G.R.I. Low Voltage Switching Device (LVSD) is a 2 AMP 12/24 VDC controller with connecting wires for connecting to a DC Power Source, a DC Load and a Dry Contact Switch. This G.R.I. Controller is designed to Switch up to 2 Amps of DC power with a form C relay that will power devices such as small motors, relays, fans, sirens, strobes and LED lights, and capable of switching from long distances using small Ga wire and most any proximity switch or dry contact device. Open loop switch required, not included. GRI has a complete line of open loop switches to meet your applications.

The G.R.I. LED Switching Device (LEDSD) is a 2 Amp 12/24 VDC controller with 2.1mm x 5.5mm connectors for use with LED Lighting (puck, rope, strip, track and more). Ideal for cabinets and display cases, CCTV cameras, closets, pantries etc. Includes 3030-T. Open loop switch required.

SPECIFICATIONS

Maximum Input Voltage	28 VDC
Minimum Input Voltage	9 VDC
Maximum Output Current	2 A at 30V
Maximum Output Power	60 W
Maximum Current Consumption	65 mA
Switch Input	Open Loop
Maximum Switch Distance	200 ft.
LED Green Flash	Turning On
LED Red Flash	Turning Off

Part Numbers

LVSD
LEDSD

Description

Low Voltage Switching Device
LED Lighting Switching Device

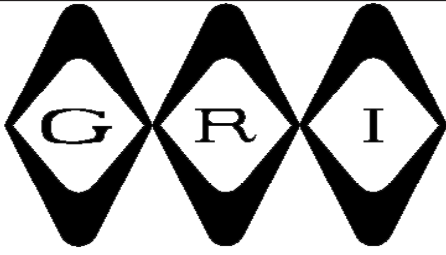

WARRANTY:

One year warranty against workmanship, material and factory defects.

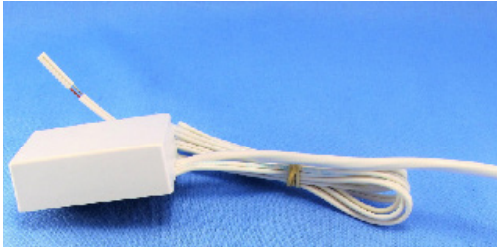

GEORGE RISK INDUSTRIES, INC.
